

ARC Architects Pretoria has enjoyed a steady growth for the 17 years that we have been servicing the industry's corporate head offices, regional retail, educational and institutional portfolios with our core service remaining architecture. As a company we realise that vision of what the developer has in mind lies at the essence of all design. It is vital to advise and execute complex and large ideas efficiently within an ever developing market.

Having recently completed the award winning West Hills Mall in Accra and currently constructing Ecobank Ghana Limited, arc Architects Pretoria is establishing a stronghold for international developers and tenants seeking opportunity in the region.

Being registered members of various South African councils in the building industry adds to arc Architects' mandatory competency in the local building environment. arc Architects Pretoria is currently working on numerous key transient nodes, mixed-use commercial hubs and regional malls within the Gauteng region as well as in Kwa-Zulu Natal.

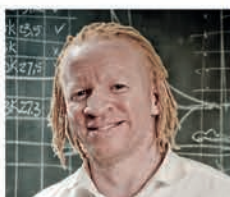

By maintaining design excellence and furthering supplementary expertise in development management, tenant co-ordination and interior design, arc Architects Pretoria will keep operating in the realms of innovation and excellence.
